## What the first photo batch shows

The visible embedded photo list includes 25 photo records, all named in a sequence: lara-27, lara-26, lara-25, down to lara-3. This suggests the page is showing one batch from a larger set. The public page says 192 photos, and the HTML includes a next link to page 2, so this source-code snapshot is not the full photostream history. It is just the first photostream page snapshot.

## Notable photo metadata

## Main timeline summary

**1 July 2013:** The Flickr account/profile appears to have been created. Shortly afterwards, a sequence of photos titled lara-27 through lara-3 was taken, then uploaded later the same day in a very tight batch.

**2013 onward:** The account exists as a Flickr photostream under the alias sexualnewzealand, with the displayed profile name Danny de Hek and username/subtitle Sexual New Zealand.

**5 May 2026:** The page/source snapshot was current enough to show Flickr's Open Graph updated time on that date, with the profile still listing 192 photos, 6 followers, and 0 following.
